PROFILE

Detail-oriented and motivated MERN Stack Developer with a solid background in building web applications using React, Node.js, and MongoDB. Highly skilled in modern front-end and back-end technologies, I possess a strong passion for coding and a commitment to optimizing user experience. Adept at collaborating in fast-paced environments, I bring a blend of technical expertise and creative problem-solving abilities to deliver innovative solutions.

WORK EXPERIENCE

Full Stack Developer Intern

Health Unity Solutions, Pvt. Ltd.

2024--Present

- Developed and maintained dynamic web applications using Next.js, enhancing user experience for healthcare professionals and patients.
- Created a comprehensive Doctor Dashboard, facilitating efficient patient management, appointment scheduling, and real-time data visualization.
- Implemented a Patient Dashboard, enabling seamless access to medical records, appointment tracking, and personalized health insights.
- Utilized state management libraries such as Redux to maintain the application state, improving performance and user interactions.

This experience allowed me to build a solid foundation in full-stack development with Next.js, contributing to impactful healthcare solutions and improving patient care efficiency.

Freelance Frontend Web Developer

Narayana Enterprises

2023-2023

- Designed and developed a fully responsive website for Narayana Enterprises using React, ensuring optimal performance across various devices and screen sizes.
- Created a custom logo, enhancing the brand identity and visual appeal of the website.
- Implemented user-friendly navigation and an intuitive interface to improve user experience and engagement.
- Integrated a contact form that allows users to easily get in touch with the owner via Gmail, facilitating seamless communication.
- Utilized modern CSS frameworks and techniques to achieve a clean and professional design, adhering to best practices in web development.
- Conducted thorough testing and debugging to ensure the website's functionality and compatibility with different browsers.
- Collaborated with the client to gather requirements, provide updates, and incorporate feedback, ensuring the final product met their expectations.

This freelancing role enabled me to apply my frontend development skills, from design to deployment, while ensuring a high-quality and user-centric web solution for Narayana Enterprises.

PROJECTS

Gemini AI

Developed a fully responsive web application named Gemini AI, utilizing React for the front end and integrating the Gemini API for backend functionality.

Used technologies are,

- React JS
- Gemini API

The key features of the project are,

- Implemented responsive design principles to ensure seamless user experience across various devices and screen sizes.
- Integrated Gemini API to enable robust and efficient data handling and processing within the app.
- signed an intuitive and user-friendly interface to enhance usability and engagement.

Airbnb clone

Developed a fully responsive Airbnb app clone, leveraging Next.js for the front end, MongoDB for the database, and Tailwind CSS for styling.

Used technologies are,

- Next JS
- Tailwind CSS
- Prisma
- Mongo DB

The key features of the project are,

- Implemented full Create, Read, Update, and Delete (CRUD) operations, allowing users to manage property listings efficiently.
- Ensured the application was fully responsive, providing a seamless experience across various devices and screen sizes.
- Utilized Tailwind CSS to create a modern and visually appealing user interface, enhancing user experience.
- Integrated MongoDB for efficient data storage and retrieval, supporting robust and scalable data management.
- Leveraged Next.js's server-side rendering capabilities to improve performance and SEO.

EXTRA - CURRICULAR ACTIVITIES AND ACHIVMENTS

- Presented by state in Badminton and served as the captain of my college's team.
- Proficient in Cricket and Swimming
- Won Dadhichi award for donating body to SCB Medical College, Cuttack, Odisha.
